

Lesiba Molokomme
Party Founder and President

CHANGE greetings to fellow South Africans and to all the CHANGERS.

It is an incontrovertible truth that our beloved country needs radical political reorganization. The current appalling socio-economic junks are signs that those in political leadership have hit a ceiling of visionary leadership and they lack political will power...they can't do much except to talk and to make promises.

We need a political refresher...**a new wine and a new wineskin**. CHANGE!

The Real State of The Nation is nothing spoken about at the fancy parliamentary red carpet, the media modeling and the feel good speech. It is deeper than this and is felt mainly by the disadvantaged people on the ground.

These are, amongst the many ills, the 'semi-legalized' hard core corruption, moral decay, racism and hatred, deepened inequality, poverty, high crime, bossy politicians, proliferation of squatter camps, the 25 year old unattended sewage spills, abortion laws, Comprehensive Sexuality Education for our 8 year olds, the job shedding economy and the skyrocketing unemployment, extensive permanent dependence on social grants by the youths, a student who is unsure his/her qualifications will bring a job, escalating fuel and unabated drug dealings etc.

Our government kicked God out of the system...Parliament and Schools. The results of this are in the open...are even felt by the unborn who is heartlessly killed in the comfort of the mother's womb, a child who has his home under a bridge, a police officer who goes to work and not sure of a safe return, a teacher who is afraid of a learner, a woman who is abused by the partner and a man silently abused in a relationship, a parent who has lost his son/daughter to drugs, and many more ills.

The good news is, it is not late to CHANGE this!

CHANGE invites all South Africans to become CHANGERS. All of us...the Human race, belonging to this beloved country. Together we can re-direct the stray socio-political ship and reclaim our hijacked economy, our misled youth, and our streets and restore our social values. We must fight to take away power from the politicians back into the hands of the CITIZENS. This is true DEMOCRACY.

We must get rid of the '*corruptocrats*' and replace them with ethical, God-honoring public representatives who will, with great love, lead us to a glorious South Africa.

We must get rid of the '*corruptocrats*' and replace them with ethical, God-honoring public representatives who will, with great love, lead us to a glorious South Africa.

South Africa needs fresh political brains, new ideas, new direction and pragmatic CITIZEN-centered policies.

- Corrupt leaders and all who watch them looting are incapable of leading us and have rendered themselves political outcasts. They can't be trusted, not even with the guarding of goats or managing a spaza shop.
- Our youth should be taken out of the entitlement spirit and hopelessness. They have been used as voting stooges for long.
- Parents' right to raise their children the best way they know how according to their religious beliefs must be restored.
- We need an urgent pragmatic and radical economic policies coupled with political-will power to swiftly rescue the country's economy from the junk status.
- The CITIZENS' power must extend far beyond the ballot box. The people's voice must be heard and respected, DEMOCRACY must be fully actioned.
- No laws should be imposed on us. This is our land and our democracy.
- Inequality and racism should not be tools to bring back 'apartheid'. We are ONE.
- People living with disabilities MUST have equal opportunities and have full access to all public and private centers.
- Crime rate MUST be lowered and this calls for serious deterrents (check our policy on crime).
- Health sector MUST be reviewed, all clinics should be open 24/7 with full service and rude, unethical nursing staffers must be dealt with drastically.
- Education system is ineffective and must be reviewed (check our education policy)
- Job shedding economy MUST be done away with. The negative impact of BEE must be cleaned. The transformation agenda should be reviewed. These and many more are detailed in our Policy Perspectives. Check it out.

I call on all the lobby groups, religious formations of all South African churches (uniform and non-uniform), the Jewish community, the businesses community, the youth organizations, NGOs, high school and tertiary students to make CHANGE their political vehicle.

NB: We will without fear speak the truth to power. We will speak the heartbeat of the grassroots CITIZENS. Though very radical, arrow talk and robust, we will do this with RESPECT to fellow politicians and with reverence to God.

The time is now, act now. If you do not act who will? Visit our Membership page and become a CHANGER today. Follow us on Facebook: Change, and become a social media activist.

Stay Blessed
